Contents

| | |
|-------------------------------|---------------|
| <i>List of Figures</i> | <i>ix</i> |
| <i>List of Tables</i> | <i>xv</i> |
| <i>About the Editors</i> | <i>xvii</i> |
| <i>About the Contributors</i> | <i>xxi</i> |
| <i>Foreword</i> | <i>xxxiii</i> |

PART I INTRODUCTION, HISTORY AND FUTURE

| | | |
|---|---|----|
| | Introduction: The Case for Socially Responsible Design for Sports | 3 |
| | <i>Anxo Roibás, Emmanuel Stamatakis and Ken Black</i> | |
| 1 | Artificially Natural: A Brief History of Modern Sport | 13 |
| | <i>Malcolm MacLean</i> | |
| 2 | Interaction Design in Sports | 33 |
| | <i>Florian “Floyd” Mueller and Stefan Agamanolis</i> | |

PART II BETTER PLACES AND SPACES

| | | |
|---|---|-----|
| 3 | It’s All About the Process! Sustainable Sports Site Planning in Regions of Transition | 53 |
| | <i>Jens Koberstein and Alexander Bergmann</i> | |
| | <i>Case Study 3.1: Activomobs</i> | 113 |
| | <i>Dr Antonia Ward</i> | |
| 4 | Sport and the City: The Role of Sport and Recreation in Planning and Urban Design | 129 |
| | <i>Katharine A. Martindale</i> | |

| | | | |
|-----------------|--|--------------------------------------|-----|
| PART III | | ACCESSIBILITY AND INCLUSIVITY | |
| 5 | Equipment Design in Inclusive Physical Activity and Disability Sport <i>George Torrens and Ken Black</i> | | 153 |
| | <i>Case Study 5.1: Accessibility for Visitors to Sporting Events: How Technology Can Help</i> <i>John Gill</i> | | 179 |
| | <i>Case Study 5.2: The Inclusive Fitness Initiative</i> <i>Dawn Hughes and Ken Black</i> | | 191 |
| 6 | Designing Inclusive Physical Activities and Games <i>Ken Black and Doug Williamson</i> | | 195 |
| | <i>Case Study 6.1: Participatory Design: Describing an Undergraduate Interactive Inclusive Design Project</i> <i>George Torrens and Ken Black</i> | | 225 |
| PART IV | | RESEARCH FOR SPORT DESIGN | |
| 7 | Ethnography in Support of Capturing the User-Experience in Sport Practice <i>Robert Sands</i> | | 233 |
| | <i>Case Study 7.1: Designing a Personal Rite of Passage as a Pathway to Healthful Fitness: An Ethnographic Case Study and the Case for Ethnography</i> <i>Inga Treitler</i> | | 271 |
| 8 | Sports' Biomechanical Data Capture and Analysis <i>James Shippen</i> | | 281 |
| | <i>Case Studies for Chapter 8</i> | | 300 |

| | | | |
|----------------|---|------------------------------------|-----|
| PART V | | POLICY AND DESIGN FOR SPORT | |
| 9 | The Sporting Legacy of Olympic Games and Major Sporting Events: Reality Reconsidered <i>Gary Armstrong, Emmanuel Stamatakis and Natalie Campbell</i> | | 307 |
| 10 | Building Bridges: Programme Design for Sport in Post-Disaster Intervention <i>Katrin Koenen</i> | | 335 |
| | <i>Case Study 10.1: The International Platform on Sport and Development: An Information Portal and Online Community for the Field of Sport and Development</i> <i>Usha Selvaraju</i> | | 353 |
| | <i>Case Study 10.2: Kgatelopele: Creating a Safe Space for Girls through Sport in Rural Botswana</i> <i>Sara Nicholls and Seodhna Keown</i> | | 359 |
| | <i>Case Study 10.3: Football Policy and Paranoia in "Post-Conflict" Liberia, West Africa</i> <i>Gary Armstrong and James Rosbrook-Thompson</i> | | 365 |
| 11 | Design for Living? Sporting Policy and the United Nations <i>Gary Armstrong and Holly Collison</i> | | 383 |
| | <i>Case Study 11.1: Meeting the Challenges of Millennium Development Goals: The Contribution of Women and Girls through the United Nations Volunteers Programme</i> <i>Alex Dupont</i> | | 403 |
| PART VI | | CONCLUSIONS | |
| | <i>Epilogue</i> | | 409 |
| | <i>Index</i> | | 413 |

List of Figures

| | | |
|-------|---|-----|
| 1.1 | North Millfields Recreation Ground | 18 |
| 1.2 | Hackney Marshes | 18 |
| 1.3 | Olympic training Otepaa | 26 |
| 1.4 | Olympic training site Otepaa | 26 |
| 2.1 | Jogging over a distance | 44 |
| 2.2 | Remote Impact | 47 |
| 3.1 | Places named in the text | 68 |
| 3.2 | Local case studies | 70 |
| 3.3 | Description of single measure No. 7 (of 14) entitled "Sports Field" | 81 |
| 3.4 | Wishes of youngsters listed in a priority ranking | 82 |
| 3.5 | Skate ramp built by young Görlitz skateboarders | 85 |
| 3.6 | Drawings of skateboarding elements by Görlitz youngsters | 87 |
| 3.7 | New skateboarding "wall ride combination" set up in 2007/2008 | 89 |
| 3.8 | Model of new BMX start ramp | 89 |
| 3.9 | Criminal youngsters and other members of the Wismar yachting club working | 97 |
| 3.10 | Young delinquent renovating a cutter on Wismar's yachting club premises | 97 |
| CS3.1 | Residents show designers round the Park Wood estate in Maidstone | 114 |
| CS3.2 | Residents organized flashcards so they showed activities they would do, would like to do and would never do | 115 |
| CS3.3 | Brainstorm of the barriers and incentives to being more active | 116 |
| CS3.4 | Brainstorm of things that could make residents more active | 117 |
| CS3.5 | Welliemobbers, a group of dog-walkers who wanted to lose weight without joining a gym | 120 |

© Copyrighted Material

| | | |
|--------|---|-----|
| CS3.6 | Backmobbers take gentle exercise under supervision of a trainer | 121 |
| CS3.7 | A Timemob leader takes residents on tours of local historic sites | 121 |
| CS3.8 | A prototype of how an Activmob rewards scheme could operate | 123 |
| CS3.9 | A prototype wellbeing chart for people to monitor their own fitness improvements | 124 |
| CS3.10 | A figure of how Activmobs would work by creating a platform for self-organized groups of people to take advantage of activities in their local area with the support of web tools and expert trainers | 126 |
| CS3.11 | The Activmob website | 127 |
| 4.1 | Kerry Soper's map of Atlanta's Olympic neighbourhoods | 131 |
| 4.2 | Telstra Dome in Melbourne's Docklands area | 132 |
| 4.3 | The space around Sydney Olympic Stadium, typically designed to allow large numbers of spectators to move around easily, now emphasises the site's emptiness | 140 |
| 4.4 | Paley Park, one of New York's noted pocket parks | 141 |
| 5.1 | Mind map of user; task; environment (UTE); and, associated stakeholders | 160 |
| 5.2 | A web diagram that can help when comparing values between products and product design specifications | 164 |
| 5.3 | A blind person (former Paralympic swimmer) during a co-designing consultation session | 169 |
| 5.4 | The breakeven point of the batch at 25 units at £215 UK each | 170 |
| 5.5 | An early version of the chassis in the original equipment manufacturer (OEM) bag | 171 |
| 5.6 | The closed-cell polyethylene foam chassis with purpose-made interface between the OEM CD player and the presentation of OEM speakers for poolside use | 172 |
| 5.7 | The chassis unit being loaded back into the beach bag | 173 |
| 5.8 | The bag being carried, but also the position in which it would hang over a starting block poolside | 173 |
| CS5.1 | How someone with macular degeneration might see their television screen | 181 |
| CS5.2 | How someone with diabetic retinopathy might see their television screen | 181 |

| | | |
|------------------------|--|-----|
| © Copyrighted Material | | |
| CS5.3 | How someone with cataracts might see their television screen | 182 |
| CS5.4 | How someone with tunnel vision might see their television screen | 183 |
| 6.1 | Inclusion Spectrum – original games version used in Youth Sport Trust TOP Skill resource | 203 |
| 6.2 | The Inclusion Spectrum | 204 |
| 6.3 | Inclusion Spectrum (definitive version) where activities based on the disability sport programme can be incorporated into the other four approaches | 206 |
| 6.4 | Open activity: cooperative game using a play canopy | 207 |
| 6.5 | Open activity: “Name Game” using a sound ball | 208 |
| 6.6 | “Knee tap” game between two non-disabled participants | 208 |
| 6.7 | Modified activity: “Knee Tap” game between disabled and non-disabled participants requiring modification to balance the activity | 209 |
| 6.8 | Parallel activity: students participating in an inclusive activities workshop develop three versions of volleyball | 210 |
| 6.9 | Separate activity: young disabled person practising sending activity with support before entering group-setting | 210 |
| 6.10 | Separate activity: boccia players with disabled peers in competition setting | 211 |
| 6.11 | Youth Sport Trust TOP Sport card showing the use of the STEP acronym | 212 |
| 6.12 | Innovator Doug Williamson with a custom-built miniature version of snooker which disabled people can play using fingers or small implements | 216 |
| 6.13 | Young Polybat player using a glove bat to improve control | 217 |
| 6.14 | National Table Cricket Finals at Lord’s, July 2008 | 220 |
| CS6.1 | Loughborough University Design and Technology undergraduates meet special needs students involved in the participatory design project | 227 |
| CS6.2 | Special needs students and Loughborough undergraduates discuss design solutions | 228 |
| CS6.3 | Final adapted game design based on input from special needs students and their staff | 228 |
| 7.1 | Full Court Game: black and white South African children put aside their differences and share the court at a tournament sponsored by Peace Players International | 244 |

| | | |
|------|--|-----|
| 7.2 | African female youths play on playground: basketball skills and HIV/AIDS education are taught to children in the PPI program | 245 |
| 8.1 | A goniometer measuring the angle of the elbow | 283 |
| 8.2 | Exo-skeleton on a subject | 284 |
| 8.3 | Inertial/gyroscope system on a subject | 285 |
| 8.4 | Kinematic chain showing accumulation of segmental speeds during a tennis serve | 286 |
| 8.5 | Gymnast with retro-reflective markers attached for a biomechanical analysis | 287 |
| 8.6 | Path of the golf club and ball from optical motion tracking | 288 |
| 8.7 | Comparison of calculated ground reaction forces and forceplate measurement | 290 |
| 8.8 | Weight distribution between the golfer's feet is measured with forceplates and indicated by the length and direction of the arrows | 292 |
| 8.9 | Forceplate with a glass top plate showing the force transducers in the corners | 293 |
| 8.10 | Pressure distribution under the foot | 294 |
| 8.11 | Simplistic inverse dynamics problem | 295 |
| 8.12 | Plot of hip moment during hip abduction/adduction exercise | 296 |
| 8.13 | Force in selected muscles | 297 |
| 8.14 | Illustration of muscle activation during a jump | 300 |
| 9.1 | A simplified model of the behaviour-change stages | 313 |
| 9.2 | Centennial Olympic Park Fountain of Rings, Atlanta, Georgia (USA) | 313 |
| 9.3 | Photo taken during a meeting for the volunteers of the XX Olympic Winter Games in Turin (Italy) | 317 |
| 9.4 | Photo titled "Hackney Loves the Olympics" | 319 |
| 9.5 | Lausanne (Switzerland). Statue representing the Olympic Circles | 322 |
| 9.6 | London (UK). Girls learning tennis during their Physical Education class at Islamia Primary School | 331 |
| 10.1 | Sri Lanka. Displaced boy tries to fly a kite as tents for IDPs seen in the background in Savukady camp, Eravur | 337 |
| 10.2 | Democratic Republic of the Congo (DRC), Mitwaba, Katanga Province | 338 |
| 10.3 | Iran. Girls playing volleyball in a post-disaster sports programme after the devastating earthquake in Bam | 341 |

© Copyrighted Material

| | | |
|--------|---|-----|
| 10.4 | Iran. Boys playing basketball in the totally destroyed city of Bam after the earthquake | 343 |
| 10.5 | Serbia and Montenegro. 17 year-old boy shows off his ball-control skills. | 344 |
| 10.6 | Iran. Tactical planning for a sport programme in Bam | 345 |
| 10.7 | Zambia. Congolese refugees (DRC) playing football, Kala camp, Kawambwa | 350 |
| CS10.1 | The logo of International Platform on Sport and Development | 354 |

© Copyrighted Material

List of Tables

| | | |
|-----|---|---------|
| 5.1 | Christophersen's 7-point definition of Universal Design | 159 |
| 5.2 | The structure of a UTE and some of the associated data collection methods and equipment | 162–163 |
| 6.1 | The STEP model with examples | 213 |
| 6.2 | Six principles of adaptation | 218 |
| 7.1 | Summarized ethnographic methods and its potential use in sport design | 246 |
| 8.1 | Comparison of advantages and disadvantages of movement tracking systems | 290–291 |
