Digital Identity Management

Perspectives on the Technological, Business and Social Implications

EDITED BY DAVID G.W. BIRCH

GOWER
Contents

List of Figures xi
List of Tables xiii
Foreword by Peter Cochrane xv

Section 1 Introduction 1

1 The Identity Vision 3
   David G.W. Birch
   Identity Management Components 3
   Exploiting Technology 4
   Building Business Models 6
   The Evolution of Digital Identity 8

Section 2 Identity Technologies 10

2 Smart Cards, Smart Identities 11
   Andrew Henderson
   The Implications of Mass Smart Card Use 11
   Stable Technology 12
   Business Implications 14
   Health Cards 15
   Social Implications 16
   Proven Technology 19
   Case Study: Estonian Electronic Identity Cards 20
      Taarvi Martens

3 A Roadmap for Biometrics 23
   John Elliott
   Planning for Biometrics 23
   Technology Roadmapping 23
   A Real Example: Person Identification for Policing 26
   Status Check 29
   Fingerprint 31
   Iris 32
   Face 33
   DNA 34
   Conclusions 35
Case Study: UK Visas 37
Steve Inkpen

4 Identity Directories and Databases 41
Alexis Scorer
- Organizational Needs 41
- What is Identity Management? 42
- Components of Identity Management 43
- Enterprise Directory Services 43
- Developing an Identity Management Strategy 47
- Conclusions 48

Case Study: US Department of Defense 50
Alexis Scorer

5 Common Sense PKI 53
John Madelin
- The Changing Role of PKI 53
- Selection Criteria 54
- Certificate Authority 54
- Support for Today’s Dynamic and Federated Business Models 58
- Conclusions 59

Case Study: RDW 61
John Madelin

6 Radio-Frequency Identification 63
Cyrus Gilbert-Rolfe
- Introduction 63
- RFID from Then until Now 64
- Gazillions of Tags 64
- Uniquely Identifying the Individual 66
- Looking Forward 67

Case Study: Manchester City Football Club 68
Duncan Martin

7 Practical Action: Federation and Mobility 73
Paul Miller
- Business Interests 73
- Liberty Alliance: Standards Make Markets 74
- Identity Theft: Scoping the Problem 76
- The Business of Identity 80
- Data Security … a Question of Damage Control 80
- Passwords … the Real Crisis 82
12 Authentication in Business

John Skipper

Federating Digital Identity at Population Scale 129
The Benefits of Federated Identity 129
Issues with Federated Identity 130
Limitations of Federated Identity 131
Authentication Network Models 132
Conventional Federated Identity Models 132
Integrated Identity – a New Model for Advanced Authentication 133
Integrated Identity – Building the Business Case 133
Evolving Population Scale Networks 134
Managing Risk Through Multiple Credentials 135
Understanding Your Customers 136
Federated Identity versus Integrated Identity 136
Towards Population-Scale Deployment 137

13 Identity Services Infrastructure: Trust and Privacy in Communities of the Twenty-First Century

Jon Shamah

The Role of ISI 139
The Evolution Toward ISI 141
ISI Fundamentals 141
Standards 142
Keys 142
Ubiquitous Networks 142
Privacy and Security 142
Products and Services 144
Implementing ISI 145
Validation in ISI 146
Distributed Architecture for ISI 146
Corestreet’s Secure Distributed Validation Design Principle 147
The Benefits of Secure Distributed Validation 148
The Corestreet Validation Infrastructure 149
Corestreet Implementation Benefits 150

Case Study: US Department of Defense 151

Jon Shamah

14 The US-VISIT Program

C. Maxine Most

Large-Scale Biometric Identity 153
US-VISIT Program Development and Approach 154
Privacy and Data Protection Implications 156
Europe’s Progress – Societal Factors are Key 158
Practical Reality – Australia and Chile Border Control Solutions 159
The Future of US-VISIT 160

15 **Building Privacy-Friendly RFID** 163

*Toby Stevens*

- Potential for Misuse 163
- RFID Applications 164
- The Privacy Impact of RFID 164
- Managing RFID Risk 165

**Case Study: A Sample Code of Conduct** 167

*Toby Stevens*

**Section 4: Digital Identity in Context** 173

16 **The ID Problem** 175

*Gareth Crossman*

- Digital Identity in Context 175
- Access to Public Services 180

17 **Planning ID Management in Government** 183

*John Elliott*

- Identity Management and Uncertainty 183
- Modern Solutions 184
- Define the Service 184
- Framework for Interoperability 186
- Preparing for the Unknown 188
- The Rapid Pace of Change 188
- Practical Example: E-Passport 189
- Technology is Not the Problem 191

18 **ID and the Law** 193

*Steve Philippsohn*

- Identity Fraud 193
- Current Legislation 194
- Passing Off 202
- Conclusion 203

19 **This is Not Your Father’s ID Card** 205

*David G.W. Birch, John Elliott and Neil A. McEvoy*

- Using Digital Identity 205
- The UK Direction 206
- Chips not Cardboard 208
20  Eavesdropping on the Future of Identity 215
David G.W. Birch and Aleks Krotoski
Digital Identity in an Online World 215
Virtual Worlds 216
Virtual Property 219
Virtual Identity 221
Digital Divisions 223

21  Cyborg Identity 227
Kevin Warwick
Introduction 227
The 1998 Implant Experiment 228
The 2002 Implant Experiment 229
Experimentation 231
Identity Issues 233
Cyborg Enhancements 234
Implications 235
Conclusions 236

Section 5: Where Next? 239

22  Digital Identity Management Implications 241
David G.W. Birch, John Elliot and Andrew Whitcombe
The Uneven Distribution 241
Timeline 242
Sector Analysis 244
Connection Technologies 246
Disconnection Technologies 247
Processing Technologies 248
Assessing Implications 249
Coming Soon 249
On the Horizon 250
Tomorrow Morning 252
The Key Implication is Choice 252
